Introduction

Competent Dental Assistants possess the knowledge, skills, attitudes, and judgement required to provide professional services. Dental Assistants engage in continuing competence activities to enhance the delivery of services to their patients and to remain current in knowledge and application of that knowledge. Completion of the College's Continuing Competence Program (CCP) components does not directly reflect a Dental Assistant's competence. However, self-assessing, completing learning activities and analyzing outcomes that CCP participation requires is considered an indirect display of competence.

These policies were developed to complement the College's Standards of Practice by defining operational terms of reference for the College and its regulated members.

The CCP Policies are subject to change without notice.

The current policies are available on the College's website www.abrda.ca.
